

Sasha Marshall

Software Engineer

SUMMARY

Two years of experience building, maintaining, and debugging impactful web applications and e-commerce sites for business success through intuitive online interfaces. Skilled in MongoDB, Node, Express, React/Redux, HTML/CSS/JavaScript.

WORK EXPERIENCE

Frontend Engineer at Akanthro | Remote

May 2023 — Present

- Build interactive and dynamic features, optimizing user engagement and functionality within Shopify themes, utilizing JavaScript and API integrations.
- Utilize Liquid, HTML, and CSS to craft visually appealing and responsive web interfaces that enhance the user experience.
- Actively contributed to the UI/UX design process, ensuring intuitive and user-friendly navigation for customers.
- Participated in code reviews, providing constructive feedback and ensuring code quality, maintainability, and best practices.
- Applied agile methodologies like SCRUM for project management.

Full Stack Web Developer at Matt Brown Consulting | Remote

July 2023 — Present

- Actively collaborating with a small team of developers on an ongoing project to design, build, debug, and maintain a React-based website that seamlessly integrates with a Kotlin Android app.
- Integrate and configure Mapbox tools to enable system administrators to track company drivers in real-time via an interactive map UI along with a Cloudinary integration to allow drivers to upload photos of completed projects and documentation for management review.
- Designed and connected backend infrastructure utilizing the MVC paradigm with Node.js and MongoDB, ensuring robust data storage and retrieval capabilities.

Full Stack Engineer at Sasha Marshall Designs | Remote

October 2022 — Present

- Collaborate with clients to gather requirements, provide technical insights, and deliver solutions that are aligned with their business objectives.
- Utilize Liquid, HTML, CSS, and JavaScript to create and update responsive web interfaces.
- Utilize MERN stack and other technologies to build web applications.

Software Engineer at 100Devs | Remote

January 2022 — July 2023

- Worked in collaboration with a team of developers to construct contemporary and responsive web applications, adhering to industry best practices.
- Developed full-stack web applications with a strong emphasis on semantic structure and code organization.
- Implemented agile project management methodologies, such as SCRUM, to streamline project development and enhance team efficiency.
